---

## PROFESSIONAL SUMMARY

Currently expanding strong working knowledge in Frontend development and MERN Stack technologies. Seeking a role where I can combine my deep technical background with modern web development skills to contribute to innovative, user-focused digital solutions and organizational growth.

### Additional Background:

Over 10 years of professional experience in ICT, including networking, servers, and system administration

---

## EDUCATION

### B.Sc. (Eng.) in Computing & Information Science (CSE) –

World University of Bangladesh, CGPA: 3.44/4

2001 - 2004

---

## PROJECT

### 1. Book-Courier- [Live Link](#) | GitHub: [Client Link](#) | GitHub: [Server Link](#),

**Overview:** Allowing browsing books, ordering, payments, and role-based library management.

**Feature:** Users can explore books, place orders, manage wishlists, and view payment history through a clean and intuitive interface. Role-based dashboards (User, Librarian, Admin) enable book management, order tracking, user control, and publishing workflows

### 2. SkillSwap - [Live Link](#) | GitHub: [Client Link](#)

**Overview:** SkillSwap is a local skill-exchange platform where users can offer, learn, and trade skills such as web development, music, language learning, yoga, cooking, and photography within their community.

**Feature:** Car Renting System: Users can browse cars, view details, and book rentals easily.

Owner Dashboard: Car owners can add cars, update listings, and manage all bookings.

Full Stack App: Built with React, TailwindCSS, Node.js, Express, and MongoDB.

---

## SKILLS

**Languages:** JavaScript

**Frameworks / Libraries:** React.js, Node.js, Express.js, Tailwind CSS, Bootstrap, HTML

**Databases & Tools:** MongoDB, Firebase, SQL, GitHub, XAMPP
